

## Parkview YMCA Family Splash Park

### New Splash Pad

Fort Wayne, Indiana

The Parkview YMCA Splash Park is 21,000 sf of fun!

The Splash Pad (or bowl) is slightly over 6,000 sf and contains water features such as a *spray cannon*, *water jet*, and *donut spray*. This play environment offers a full range of exciting play opportunities from gentle mists for the little ones to dynamic action for teens. This massive water playground is designed for kids of all ages!

The longstanding tradition of Vintage Archonics' commitment to the environment and conservation of natural resources is displayed in the Splash Park's recirculated water supply. All water, with the utmost concern for the health and safety of the children, is returned to a central collection point, filtered, sanitized and recycled. This design feature conserves millions of gallons of water for a splash park of this size in just a single operating season.

Construction Cost \$515,000  
Completed June 2007  
21,000 Square feet
